

Figure 1: Map of the Aurion-B2Gold JV and Risti (Aurion 100%) properties.

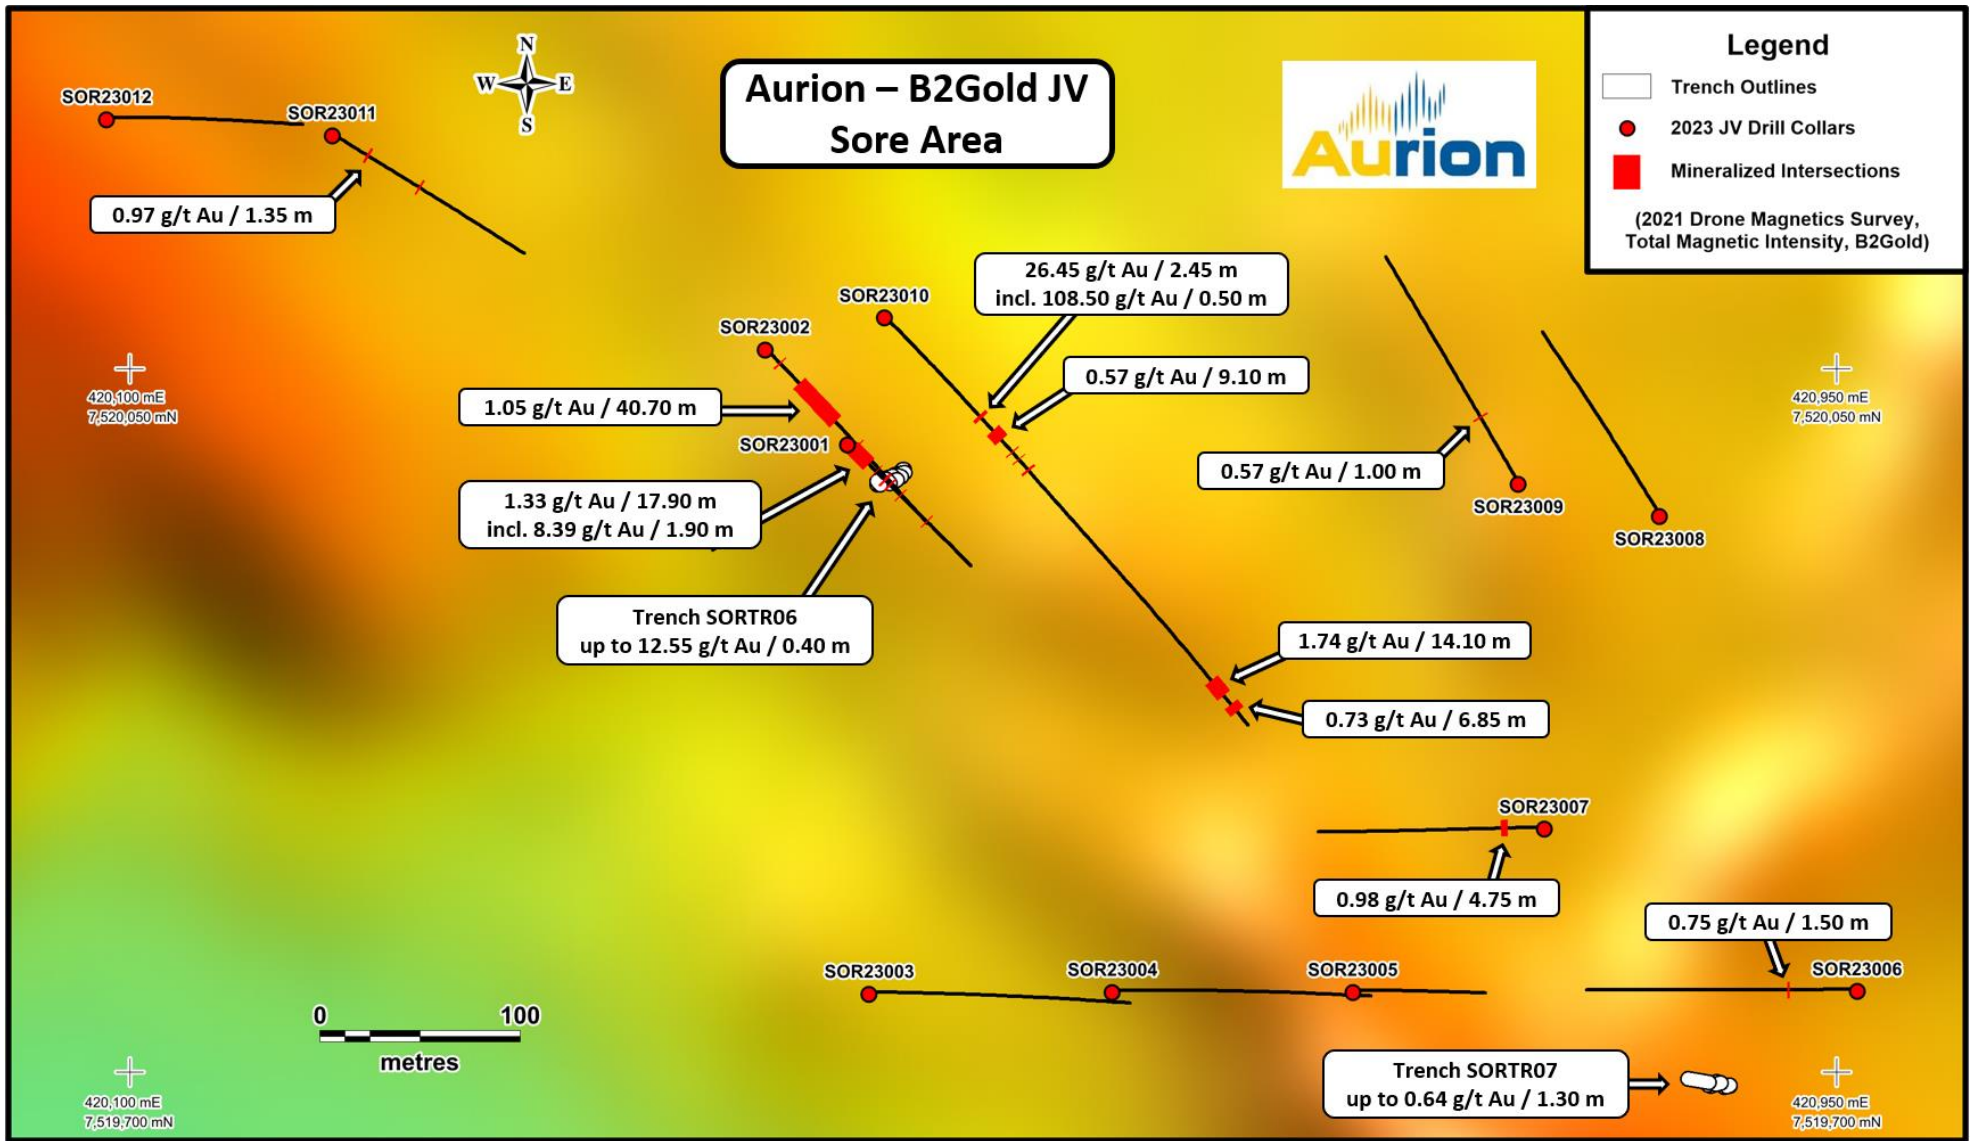

Figure 2: Drill holes at the Sore prospect, Aurion-B2Gold JV.

Figure 3: SOR23010: pyrrhotite-pyrite breccia (108.5 g/t Au over 0.5 m from 105.8 m) with quartz-dolomite vein fragments and minor sheared graphitic mudstone. Abundant disseminated medium-grained barren arsenopyrite at the end of interval.

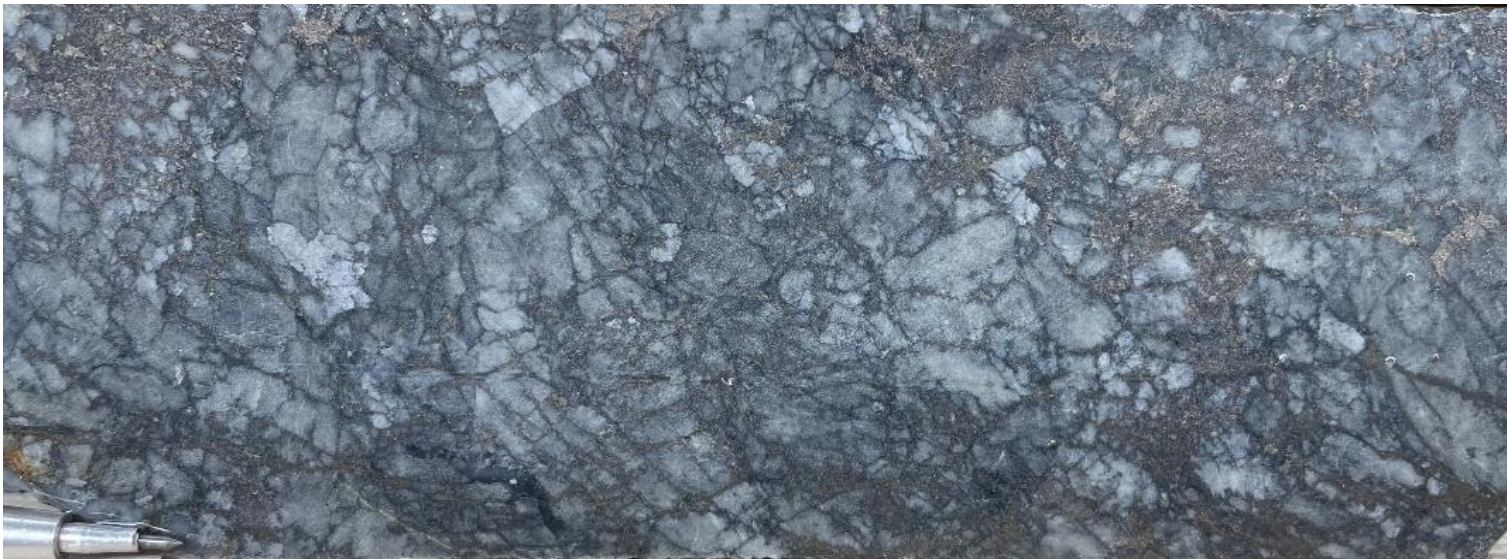

Figure 4: SOR23002: FeMg-dolomite-quartz-pyrrhotite vein breccia (2.1 g/t Au over 1.1 m from 45.7 m) part of 1.05 g/t over 40.7 m from 38.4 m.
